

MOHAMED GAMAL

Senior Odoo Developer | Odoo Techno-Functional Consultant | AI & Data Analyst

+20 1016843962 | mohammedgamal37130@gmail.com | Cairo, Egypt

Portfolio: mohamedgamal-attia.github.io/mohamed_gamal_portfolio | linkedin.com/in/mohamedgamal37130

PROFESSIONAL SUMMARY

Senior Odoo Techno-Functional Consultant and Developer with extensive experience delivering Odoo Enterprise solutions in production environments. Combines deep technical expertise—custom module development, business workflows, security rules, REST API integrations, and performance optimization using Python and PostgreSQL—with strong functional capabilities including requirements gathering, business process analysis, gap analysis, and end-user training. Designs and delivers structured Odoo training programs for employees and key users, bridging the gap between business teams and technical implementation. Manages the full lifecycle from requirement analysis and story sizing to development, testing, CI/CD deployment, and user adoption. Strong foundation in Data Analytics and Applied AI, enabling intelligent automation, reporting systems, and decision support within ERP environments. Experienced across Risk Management, Compliance, Food Security, and Government Administration sectors.

CORE COMPETENCIES

Techno-Functional Consulting: Requirements gathering & analysis, business process mapping, gap analysis, functional documentation (BRD/FRD), solution design, UAT support

Odoo Training & Enablement: Design and delivery of Odoo training programs for employees and key users, training materials & video modules, onboarding, post-go-live user support

Technical Delivery: Custom module development, workflow automation, REST API integrations, performance optimization, CI/CD deployment

PROFESSIONAL EXPERIENCE

EJAD Digital Solutions Co — Senior Odoo Developer | Saudi Arabia | Apr 2026 – Present

- Develop and maintain Odoo Enterprise backend solutions across multiple concurrent projects
- Gather and analyze business requirements with stakeholders and translate them into scalable custom modules, workflows, and automation features
- Optimize system performance through ORM tuning and backend refactoring
- Collaborate in Agile/Scrum teams using GitLab CI/CD pipelines

EjadTech — Odoo Developer (Odoo Enterprise) | Egypt / Saudi Arabia | Sep 2024 – Mar 2026

- Led end-to-end backend implementation across multiple projects from requirements gathering to production deployment
- Developed custom modules including models, business logic, security rules, and workflow automation
- Built third-party integrations using REST APIs and scheduled jobs
- Improved system performance through PostgreSQL query optimization and code refactoring
- Delivered structured Odoo training sessions and materials for client employees and key users to drive adoption

DOTec Professional Corporation — Odoo Developer (Remote Contract) | United States | Nov 2025 – Present

- Delivered Odoo customizations, bug fixes, and backend enhancements for US-based clients
- Implemented scalable ERP solutions aligned with complex client requirements

Margins Developments — Odoo Techno-Functional (Contract) | Cairo, Egypt | Oct 2025 – Jan 2026

- Gathered business requirements and customized CRM, Sales, and Accounting workflows to match business-specific processes
- Developed automated reports and workflow automation to improve operational efficiency
- Trained end users on customized workflows to ensure smooth adoption

Computing Gate for Information Technology — AI Software Engineer (Part-Time) | Saudi Arabia | Aug 2025 – Dec 2025

- Designed and implemented ML/DL models for real-world enterprise applications
- Prepared datasets, trained models, and optimized performance for production deployment
- Integrated AI components into backend ERP systems to enable intelligent automation

Digital Egypt Pioneers Initiative (DEPI) — Data Scientist | Cairo, Egypt | Mar 2024 – Sep 2024

- Built computer vision models achieving 98% accuracy using YOLO architecture
- Improved object detection speed and overall model performance through optimization techniques

ExploreAI Academy — Data Scientist | Remote | Jun 2023 – Aug 2024

- Delivered end-to-end data science projects spanning data analysis, modeling, and business insight generation
- Communicated actionable insights to stakeholders to support strategic business decisions

CognoRise InfoTech — Data Analyst | Cairo, Egypt | Sep 2024

- Cleaned and analyzed large datasets; created interactive dashboards to support decision-making

TECHNICAL SKILLS

Odoo & ERP: Odoo Enterprise v14–v18, Custom Module Development, ORM, QWeb Reports, XML Views, Security Rules, Automation, Workflows

Functional: Requirements Gathering, Business Process Analysis, Gap Analysis, Functional Documentation, End-User Training, UAT

Languages: Python, SQL, JavaScript, HTML/XML, CSS

Databases: PostgreSQL (query optimization, complex queries), relational database design

AI & Machine Learning: Machine Learning, Deep Learning, Computer Vision (CNN, YOLO), LLM-based Automation

Data & Analytics: Power BI, Tableau, Excel (dashboards & reporting), SQL analytics

DevOps & Tools: GitLab, CI/CD Pipelines, Unit Testing, Version Control (Git)

Methodologies: Agile, Scrum, Requirement Analysis, Story Sizing, Performance Optimization

EDUCATION

Beni-Suef University — Bachelor's Degree, Faculty of Computers and Artificial Intelligence

Sep 2020 – Jun 2024 | Grade: Very Good

ExploreAI Academy — Data Science Program

Sep 2023 – Jul 2024

CERTIFICATIONS

- Introduction to Data Analytics
- Foundations: Data, Data, Everywhere (Google)
- Flutter Clean Architecture [2022] – Flutter 3
- The Complete Dart Development Guide
